

HR HAMBURGER PATTY MACHINE

Our machines are made of anodized aluminium alloy and are resistant to acids, salts and oxidation..

Service life length depends on compliance with the use and maintenance

Instructions which must always be on hand when operating the machine.

INSTRUCTIONS FOR USE

- 1) Pull lever (21-22) upwards
- 2) Press button (35) to lower the ejector (32) inside the patty mold (34).
- 3) Put one of the cellophane disks stored in the (30) bowl onto the ejector plate.
- 4) On the cellophane disk place the desired quantity of ground meat (quantity must not exceed the mold volume). Cover the meat with another cellophane disk.
- 5) Pull the lever downwards and press gently to squeeze the meat.
- 6) Return the lever to position 1 and remove the patty.
- 7) Repeat the above sequence for another delicious patty.

MAINTENANCE INSTRUCTIONS

- 1) No particular maintenance is required. To clean use a cloth soaked in water.

Warranty: two years.
